ABSTRACT

Antisense compounds, compositions and methods are provided for modulating the expression of phosphatidylinositol-4-phosphate 5-kinase, $I\alpha$. The compositions comprise antisense compounds, particularly antisense oligonucleotides, targeted to nucleic acids encoding phosphatidylinositol-4-phosphate 5-kinase, $I\alpha$. Methods of using these compounds for modulation of phosphatidylinositol-4-phosphate 5-kinase, $I\alpha$ expression and for treatment of diseases associated with expression of phosphatidylinositol-4-phosphate 5-kinase, $I\alpha$ are provided.
